## Compilation Instructions - Milestone 2

Use the CLI tool *run.py* as follows

```
python3 run.py [-h] --input INPUT [--output OUTPUT] [--verbose]
```

### Arguments

1. **INPUT** - This is the location of the input python file, this is a mandatory argument.
2. **OUTPUT** - This is the location of the output PDF file, this is an optional argument.
3. The **--verbose** flag gives the detailed trace of construction of the tree.

The **-h** option can be used for help in running the script.

### Relevant Details

Tabs are not converted to spaces in the program, and will lead to syntax error.

### Tools used

1. GNU Bison
2. Flex
3. GCC
4. python (for CLI)
